EXAMINER'S AMENDMENT / COMMENT

Oath/Declaration

This application presents one or more claims for subject matter not originally claimed or embraced in the statement of the invention. The original claims and statement of the invention do not contain any discussion of deriving a client event from the at least one state event prior to transmission of the client event to the respective client, wherein the deriving of the client event occurs upon placement of the at least one state event in the client event queue or upon removal of the at least one state event from the client event queue, and further wherein said embedded functions that encompass a basic set of aggregation and combination rules for state events are removed from the client event, as in claims 1, 21, 50, and 55.

A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

Allowed Claims

Claims 1-3, 5-15, 17-23, 25-31, 33, 34, and 50-54 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

none of the qualifying prior art references of record, taken alone or in combination, disclose or reasonably suggest: a combination of elements as claimed in independent claims 1, 21, 50, and 55, wherein deriving a client event from the at least one state event occurs prior to transmission of the client event to the respective client, wherein the deriving of the client event occurs upon placement of the at least one state event in the client event queue or upon removal of the at least one state event from the client event queue, and further wherein said embedded functions that encompass a basic set of aggregation and combination rules for state events are removed from the client event. Specifically, the prior art of record fails to disclose or reasonably suggest that deriving a client event from the at least one state event includes removal of embedded functions that encompass a basic set of aggregation and combination rules for state events, as such are recited in combination with the other claim elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
